

1 **ABSTRACT**

2 A CPU upgrading adapter for an XBOX game machine is composed of a
3 circuit board on which a socket frame and a switched are electrically connected.
4 When the original CPU is removed from a motherboard of the XBOX game
5 machine, the CPU upgrading adapter is then mounted on the motherboard to
6 receive a new high speed upgrading CPU. Such an upgrading CPU is chosen
7 from an Intel© Pentium-III-S™ CPU, a Pentium-III™ CPU or a Celeron™
8 CPU.
